

Leander PPT 脚手架

Reusable Editable Deck Scaffold

Make a Well Change.

We continuously expand, optimize and try out our products and solutions to pinpoint the optimal relationship between AI and human beings in different industries

01

Componentized Expression

Turn recurring slide problems into reusable layouts, components, and QA rules.

Structure

Visual

QA

Three Metric Cards

For quantified value, benchmark evidence, and staged benefits.

30%

Efficiency

Use a strong number for the claim; keep body text to source and boundary.

2.5x

Response

Number, unit, source, and scenario should appear together.

P0

Priority

When a point is not numeric, use a clear decision level.

Sample numbers are layout placeholders. Real decks must label source and estimate boundaries.

Big Word + Card Matrix

For strategic judgement, value statements, and operating principles.

Lower Cost Raise Speed

Use the left side as the memory anchor and the right side for reusable evidence or actions.

01 Product

Reusable components reduce repeated design and development work.

02 Project

Delivery artifacts become traceable and easier to repair.

03 Management

Shared language improves decision quality and review speed.

04 Operations

Reusable examples reduce repeated onsite trial and error.

Four-Column Mechanism

For four values, four roles, four capabilities, or four process links.

01 Operate

Connect metrics, process, and action.

Visible

02 Govern

Close the loop from issue to solution.

Closed Loop

03 Assetize

Turn one-off experience into reusable knowledge.

Reusable

04 Decide

Unify language across teams.

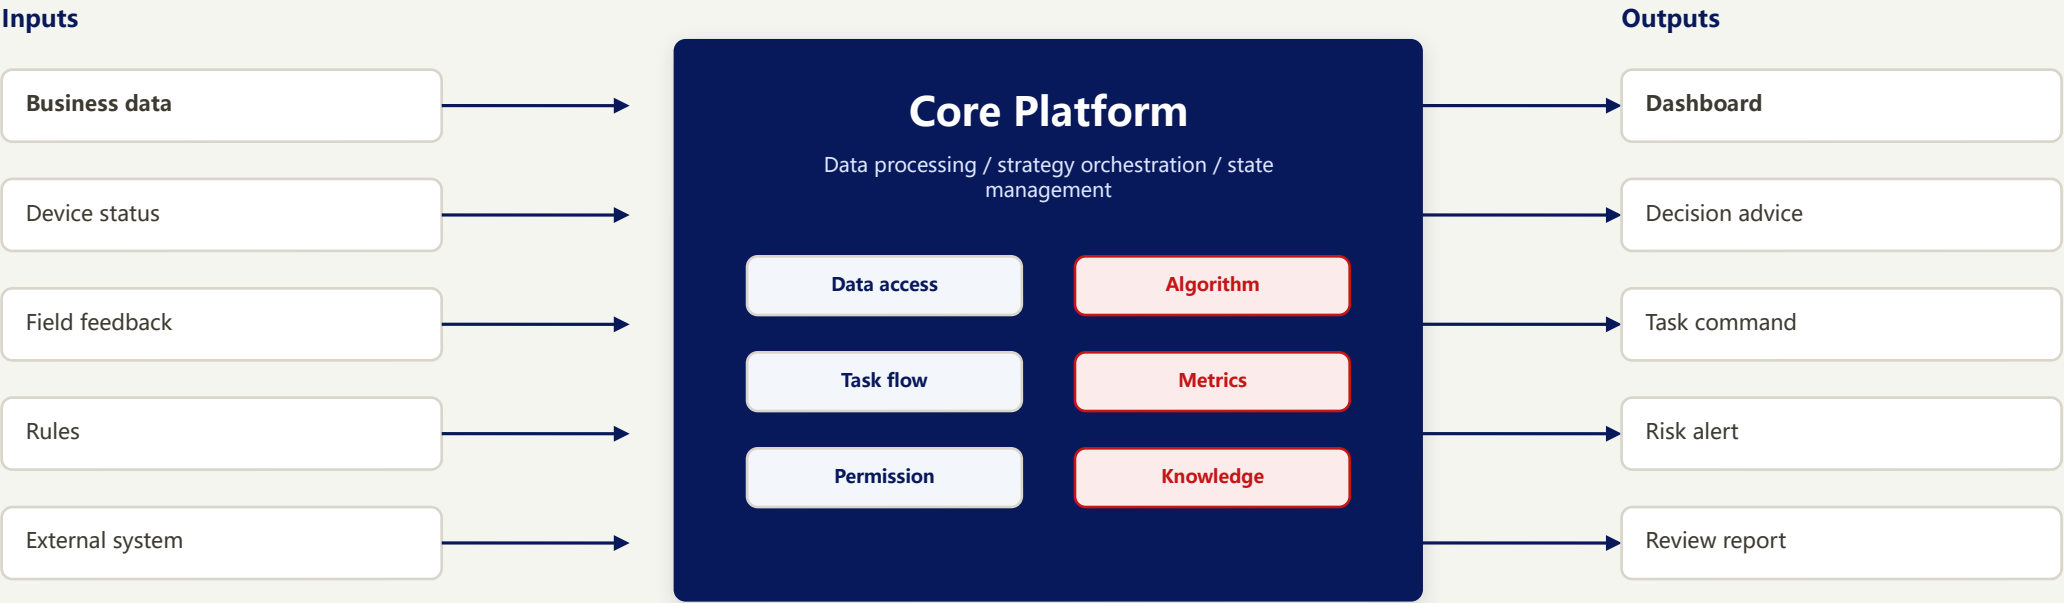

Aligned

System Architecture Center

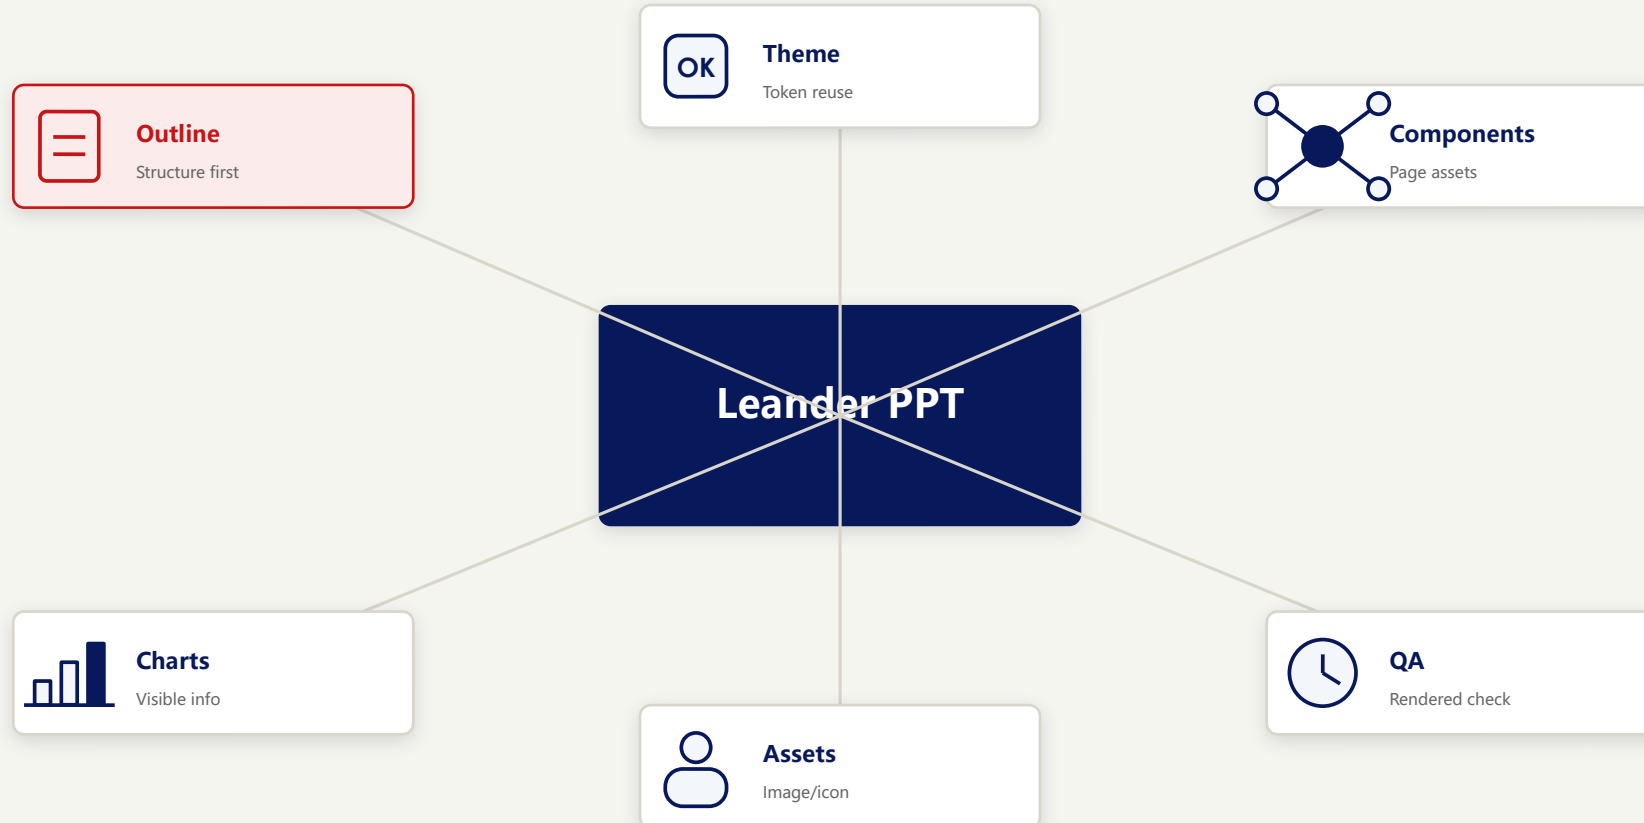

For platform, product architecture, data flow, and control flow.

Hub-Spoke Capability

For showing how one core system supports multiple modules or roles.

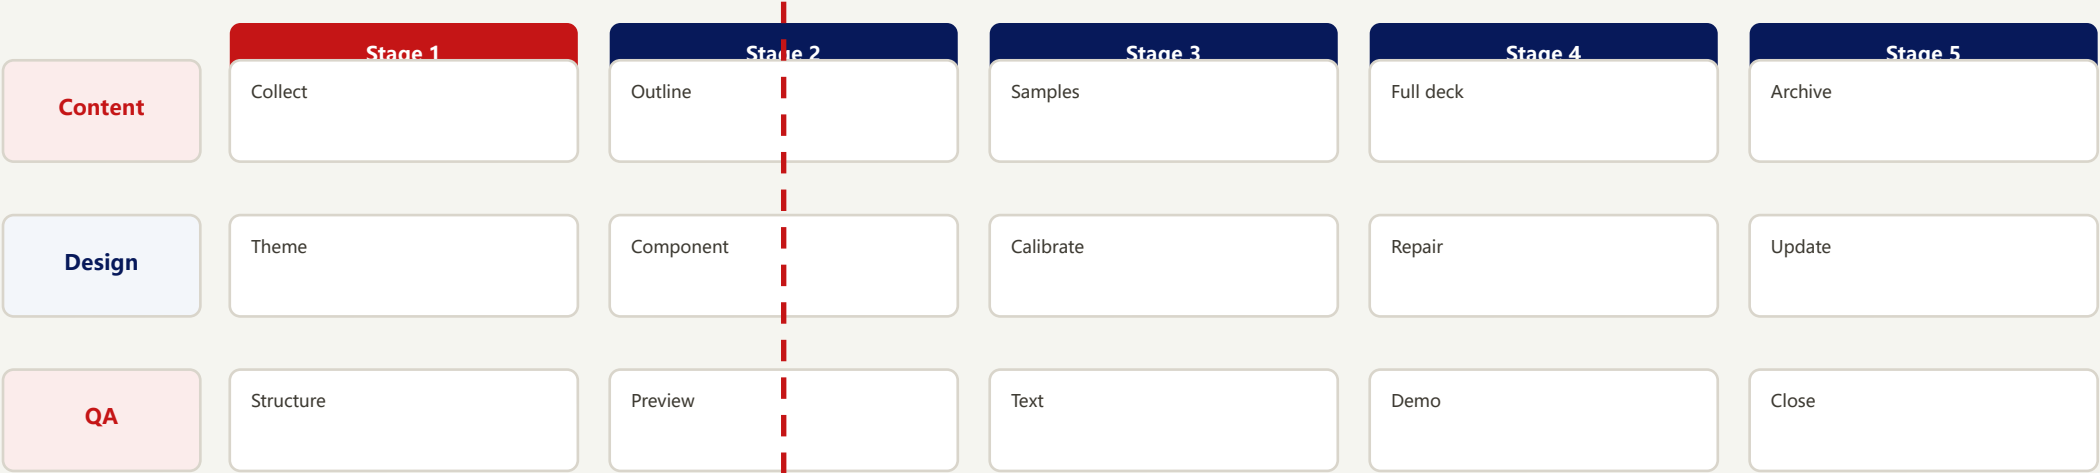

Hub-spoke pages must explain relationships, not just decorate the page.

Roadmap Swimlane

For version planning, delivery rhythm, and multi-team plans.

把重复的页面问题，沉淀为可复用的**组件与规则**。

Make a Well Change.
